Unlock With Confidence
Unlock The Air You Breathe
Tackle viruses and airborne threats with the Fellowes’ collection of air purifying machines. AeraMax Professional can significantly help reduce the spread of viruses. It’s four-stage filtration process comprises of a proven method to effectively clean the air, to create safer spaces.

Firstly, the pre-filter captures large particles and contaminants (protecting the lifespan of other filters). Next, the Active Carbon filter adsorbs odours and VOCs from the air. After, the True HEPA filter captures and traps 99.97% of airborne particles. Finally, the PlasmaTrue™ Bipolar Ioniser improves the capture efficiency of the particulate filter. Also, new laboratory testing now shows Fellowes Air Purifiers are 99.99% effective against coronavirus.*

Another great feature of these air purification systems is the patented EnviroSmart™ Technology, that uses dual self-regulating laser sensors to measure sound, motion and air quality – so that AeraMax Professional only works when it needs to. All other times, the machines stay in standby mode, saving energy whilst extending filter lifespan. PureView Technology is a display on the front which shows real time VOC/Odour levels.

*Demonstrated to be effective in reducing an aerosolized airborne concentration of a surrogate coronavirus in a test chamber reaching 99.99% airborne reduction within one hour of operation based on independent laboratory testing.
What are Type IIR Masks?

Type IIR face masks (EN14683) are medical face masks made of up to a 4 ply construction that offers protection against large particles, including dust, mist, other airborne particles, influenza and other diseases. They have splash resistant layers.

What are Type FFP2 Masks?

FFP2 face masks are the equivalent of N95 face masks, which meet the guidelines from The World Health Organisation for protection against Covid-19. FFP2 masks prevent the same particles as IIR from entering the body through the mouth and nostrils. They are also very light weight and comfortable, shaping to your face with a moulded nose bridge that can be adjusted to fit.
Masks

Transparent Mask

The CLR-Mask is a fully transparent single use visual communication mask which does not fog.

Offering full protection from fluids & particles, the CLR-MASK can promote a more relaxed atmosphere where visual cues are key to understanding.

The CLR-Mask allows the users entire face and facial expression to be seen, making communication more human, natural and accessible. Transparent, see-through masks are important for so many people including deaf and hard of hearing individuals, older people, children, schools and teachers, interpreters and translators, people who may not speak the same language, people experiencing confusion, stress or anxiety, essential employees, customer-facing employees, workers in noisy environment, immunosuppressed environment and their caretakers.

Pack of 50
Product Code: 800023
Unlock The Surfaces You Touch
Cleanline® Acid Washroom & Limescale Cleaner

A concentrated 4-in-1 washroom cleaner, descaler, disinfectant and deodoriser. Proven effective against a wide spectrum of micro-organisms including E. coli and coronavirus. Highly concentrated and economical in use, dilute 1 in 50 parts (2%) to meet the requirements of EN14476 and EN1276.

CL3002 5L, Case of 4
Product Code: 037084

CL3001 1L, Single
Product Code: 037443S

CL9008 T8 Label Trigger Bottle
Product Code: 019180

Cleanline Super Washroom Cleaner & Sanitiser

A powerful multi-surface bathroom cleaner and sanitiser safe for use on most hard surfaces, fixtures and fittings. Tested to EN1276.

CL3022 2L, Case of 2
Product Code: 037425
Surface Disinfectants

Cleanline® Chlorine Tablets

1.67g NaDCC disinfectant tablets that have a complete spectrum of biocidal activity against bacteria, viruses, algae and fungi. Suitable for general-purpose disinfecting of most non-porous hard surfaces. Each tablet releases a minimum 1,000 parts per million (ppm) available chlorine per 1 litre of water.

Tub of 200 Tablets
Product Code: 038009

BioHygiene All Purpose Sanitiser Unfragranced

An environmentally friendly, food safe all-purpose cleaner and sanitiser. Highly concentrated and tested to EN 14476, EN 1276 and EN13697.

5L, Case of 2
Product Code: 033820

2Pure OdorBac Tec⁴

OdorBac Tec⁴ is a powerful concentrated odour eliminator, multi purpose, multi surface cleaning fluid. Mixed at 1:1, provides a 99.99% virus kill in 1 minute. Tested to EN14476 and EN1276.

5L, Single
Product Code: 044042
Cleanline® Room Sanitiser Fogger

To promote safe environments, businesses are increasing their cleaning routines in both depth and frequency. Cleanline Room Sanitiser Fogger provides a total-release aerosol solution that quickly and effectively fogs room surfaces – disinfecting all areas which may otherwise be overlooked.

Working quickly in 20 minutes - this simple-to-use, powerful solution has been specially formulated with antibacterial and antiviral active substances offering total protection and reassurance.

Ideal for spaces of up to 100 cubic meters.

The single-use fogger is effective against enveloped viruses and bacteria – including Coronavirus. Tested to EN14476, EN1650 and EN1276.

200ml, Case of 6
Product Code: 031959

Surface Disinfectants

Cleanline® Ultra Disinfectant

Kills 99.99% of Coronaviruses in under 1 minute and conforms to protocol EN 14476 & BS EN 16777*

KEY FEATURES:
• Fragrance-free, chlorine-free, alcohol-free cleaner/disinfectant.
• Suitable for the high level disinfection of surfaces in hospitals, long term care facilities, institutions, restaurants, food processing plants and schools.
• Highly effective against bacteria and viruses and independently tested to a range of standard test methods.
• Refill spray bottles from 5L eco-refill to reduce plastic waste.

HIGH EFFICACY PERFORMANCE:
• Broad-spectrum cleaner/disinfectant with high levels of antimicrobial efficacy.
• Virucidal activity against viruses and passes EN 14476 and BS EN 16777 with a contact time of only 1 minute.
• Bactericidal (inc. MRSA, E. coli).

*Against Feline coronavirus as a surrogate for other members of the Coronavirus family including SARS-CoV-2

CL4058 750ml, Case of 6  Product Code: 062138
CL4059 ECO-Refill 5L, Case of 4  Product Code: 039422

Cleanline® Ultra Disinfectant Concentrate

Cleanline Ultra Disinfectant is a high performance disinfectant with broad spectrum activity against bacteria, yeast and viruses.

CL9011 T11 Trigger Bottle  Product Code: 019101
CL4069 5L Concentrate, Single  Product Code: 037010
Protect your facility with the revolutionary system that helps reduce pathogens like never before. The innovative electrostatic sprayer, with the patented PowerWrap™ nozzle, delivers trusted Clorox® solutions to the front, back and sides of surfaces. It pairs an innovative electrostatic sprayer with Total 360® Disinfectant Cleaner to deliver superior coverage in an efficient, cost-effective way.

When used in conjunction with Clorox® Total 360® Disinfectant Cleaner:
- Kills 99.9% of bacteria in 5 seconds
- 44 organism claims: Kills cold and flu viruses, MRSA and norovirus in 2 minutes or less
- One-step disinfecting
- Eliminates odour
- Sanitises soft surfaces
- Inhibits the growth of mould and mildew for up to 7 days

Clorox® Total 360® Disinfectant Cleaner

22 Organism Claims - Kills human coronavirus, cold and flu viruses, MRSA and Norovirus in 2 minutes or less. One-step disinfecting, eliminates odours.

3.4 Litres, Case of 4
Product Code: 035942
The Comac e-Spray is a professional gun sprayer that uses the principle of electrostatic induction to distribute disinfectant solutions effectively and uniformly on surfaces.

It is lightweight and very comfortable, powered by a lithium battery that lasts for several hours. The solution is sprayed in small, light drops, which reach every point of the area to be treated and settle effectively. Through the electrostatic charge, the drops are attracted by the target surface and while laying down, they create a sanitising coating.

Electrostatic hygienisation allows sanitising solution to be quickly and evenly coated on surfaces. The electrostatic applicator provides an electrical charge to the solution. The charged molecules repel each other, so they keep an even distance from each other but, at the same time, they are attracted to the surface to be treated. The strength of the charged particles is greater than that of gravity, so they are immediately attracted by the surface and do not fall to the ground. The attraction therefore ensures that all the particles of the solution settle on the surface, without leaving out any areas.
Zoono is colourless, odourless, non-leaching, environmentally safe, non-corrosive and whilst completely gentle for humans and animals, it is deadly for a wide range of harmful viruses, bacteria, fungi (mould) and yeasts.

When applied to a surface by spraying, wiping or electrostatic application; Zoono leaves behind a mono-molecular layer that permanently bonds to the surface. These molecules are antimicrobial, silane-based polymers that covalently bond to the surface forming a barrier of positively charged microscopic pins.

The positively charged microscopic pins attract and pierce negatively charged pathogens. The pins rupture the cell walls. This causes the pathogen to break up with lethal effect.

Zoono Z-71 Microbe Shield Surface Sanitiser

Water Based
No Alcohol
No Harsh Chemicals
Protects Surfaces up to 28 days

Product Code: 061433
Testing Surfaces

Fresh Check

The First Affordable Hygiene Verification Tool
Now more than ever you’ll need to check that a surface is not contaminated with Pathogens – to do this easily and cost effectively, use the new innovative Fresh Check.

Fresh Check is the fastest, simplest and most affordable way to identify if your surfaces and equipment are clean. If the spray changes from purple to any other colour, it indicates that dangerous levels of contamination are left on the surface.

Whether it’s viruses or bacteria, Fresh Check ensures high standards of cleanliness are achieved and maintained.

Why Glove Quality Matters

Since the beginning of the pandemic, we have seen a flood of cheaper protective products, especially gloves, which contain defects, exposing users to the risks they are supposed to be protected against.

For example, the variability of quality has seen multiple reports of splitting gloves. This has had two key worrying effects:

- Organisations have had to use more gloves than they need and are thus spending more overall. There have been reports that, to ensure gloves do not split, wearers are doubling up. This also presents an environmental issue as more gloves end up in landfill.

- The health and safety of users is being compromised. In the case of healthcare workers, the exposure to infectious agents due to repeatedly splitting gloves is a critical issue for both wearer and patient. For cleaning operatives, this exposes them to harmful chemicals which can lead to skin disorders.
Unlock Confidence in Buildings
The SARS-CoV-2 Rapid Antigen Test is a rapid chromatographic immunoassay for the qualitative detection of specific antigens of SARS-CoV-2 present in the human nasopharynx.

This test is intended to detect antigen from the SARS-CoV-2 virus in individuals suspected of COVID-19. The test is intended for professional use only.

Kit components:

- Test Device (individually in a foil pouch with desiccant)
- Extraction buffer tube
- Nozzle cap
- Sterile swab
- Film (can be attached to the test device when performing outdoor testing)
- Instructions for use and quick reference guide

Test results available after 15 minutes.

No Contact Digital Infrared Thermometer
T-100

This no contact, handheld infrared thermometer makes taking temperatures easy. Simply point the thermometer at the person whose temperature you wish to take, then press the button and within a matter of seconds, the temperature will appear on the clear digital display.

It's fast and convenient and allows you to check your health and for signs of the virus in seconds.

Single
Product Code: 101009
Over long periods of disused, pipes can develop a build-up of organic waste, which can lead to issues with water availability and cleanliness once a building is reoccupied.

However, there are ways you can avoid this, primarily by taking proactive steps to clean the pipes in your building before vacating it.

Using non-pathogenic bacterial treatments like eco-WMT Uric Acid Digester Granules are a good solution as it digests the uric acid crystals/scale digester with limescale destroying bactophiles incorporated.

Being completely free from pathogens, chemicals, biocides, bleaches, and non-synthetic enzymes, the eco-WMT product also requires no COSHH or PPE to use or handle.

2kg Tub
